## Worksheet: Sports injury news report

Professional sports people are at risk from injuring their bones and joints. Your task is to create a TV news report about an injury.

You can base this on a real sports person of your choosing who has had an injury in the past or make up a sports person and what injury they have.

You need to make sure the science in the report is correct. You may wish to include a diagram to explain the injury.

Use the internet to do your research and then use this sheet to help organise your findings.

Sports person .....has today been injured playing.....
The part of their skeleton they damaged is...
They did this by...
This will keep them away from playing sport because...
The treatment they will need is...
This will help repair the damage by...
